ATTRACTOR FIELD THERAPY

- INTRODUCTION -

In our ancient past mankind was graced by God with the keys to our health and well being. The form this blessing took was the knowledge of the Acupuncture Meridians detailing the flow of life energy within our beings.

Through centuries of study man has only scratched the surface in his understanding of this marvelous gift. The time for more blessings has arrived. Below are detailed instructions which will allow man to free himself from the crippling effects of the addictions as well as emotional and physical ailments.

ATTRACTOR FIELD THERAPY (AFT) is an outgrowth of the seminal work of David R. Hawkins, MD, Ph.D., author of "Power Vs Force: The Hidden Determinants of Human Behavior". In this work, Hawkins presents the results of 25 years of historic research into human consciousness, and provides a wake up call to humanity. In his preface, Hawkins states: "We think that we live by forces we control, but in fact we are governed by power from unrevealed sources, power over which we have no control."

Hawkins' book, and video tapes provide the background necessary to begin to understand attractor fields, and their influence in our lives. The universe does not work in the ways that we have been taught. It is time to awaken and to learn the truth.

Dr. Hawkins embraces Rupert Sheldrake's concept of "M-fields", invisible energy organization patterns which establish the form of various levels of life. Like gravity and magnetic fields, which cannot be seen, these energy forces shape not only our physical beings, but our mental state/context as well. It is these unseen forces that are at the source for the scientifically unexplainable, such as cellular differentiation. This process cannot be explained genetically, since every cell has the same genetic information. How does one cell become brain tissue, and the other part of your big toe? Genes are not what science claims: they do not hold the keys to health.

The finding of genetic abnormalities in various "hereditary" disorders is a coincidental occurrence caused by an unseen, and therefore overlooked, attractor field. Similarly, nowhere in the genes can be found the source for the startling psychological and behavioral similarities of twins that have been raised apart since infancy. How can genes possibly predetermine which brand of cologne will be chosen, or clothing taste?

Our scientific technology has failed to live up to its promise of a better world and a better quality of life. We need a new paradigm, one that promotes independence and self sufficiency, rather than fear, despair, apathy, and poverty. We have been misled since the time of Newton. We have all accepted the mistaken idea that cause can be found in the material universe. We have

focused our energies for centuries on drawing finer and finer distinctions within the material universe in our quest for the truth. We have been looking in the wrong place.

Drawing on Dr. Hawkins' findings and methodology, meridian energy altering formulas have been developed which allow for the elimination of the energy fields which are at the source of Man's mental and physical disorders. For the first time in Man's history, we have the tools at our disposal to keep at bay the unseen forces that rule our existence.

AFT physical treatments work as specified in their instructions removing both the symptoms of disease and the energy field responsible for the particular disorder.

Depending on life style choices, ongoing belief structures, values, etc., any disease energy field may be acquired, or reacquired across time. Daily use of LoC formulas for an extended period of time remains the only method of insuring freedom from these unseen forces. The LoC formulas also find value in psychotherapy and personal advancements in consciousness.

If you have no need for any of these techniques you are a rare and fortunate individual. You are encouraged to share what you have found with someone who is less fortunate, they are in the vast majority.

A response form (Treatment Survey) requesting information on treatment success is included in this web site. Success rates from this feedback on the various treatments will be included in future updates of this site. This web site will serve as a "living laboratory", free from the influence of those special interests who have monetary investment in the future direction of health care. Knowing the results obtained from those who use these treatments is a vital part of the process.

-TREATMENT DIRECTIONS-

AFT treatments are specific techniques for interrupting the energy flow through the Meridians used by acupuncturists. There are no needles, and no discomfort at all. There is nothing to buy.

These treatments must be carried out *exactly*. *Nothing* should be added nor omitted: the formulas are perfect exactly as they are presented. They are not painful, complex, nor distressing in any way. The effect they have is equally gentle.

Casual clothing may be worn during treatments, however bulky coats or sweaters and eyeglasses should be removed. Treatment points exist in the same locations on either hand or side of the head and body, and may be used interchangeably.

While one person can work alone, two people are recommended. This may take the form of one person reading, and the other performing the specific tasks required. The "reader" should tell the person being treated the specific action which should be taken. This action will always involve *lightly* tapping an *exact* number of taps to a specific meridian location. If a "reader" reads the area that the person needing treatment should tap, they should indicate the number of taps to be applied. Thus, when the symbol OE appears in an indicated formula, they should say "Tap the

outside of the eye 20 times"; if the symbol were BH they should say "Tap the back of the hand 75 times". The more preferred method is for one person to treat the other. This *is* the ultimate form of caring for your loved ones.

Treatment *timing is important!* Set a time that you can use to perform your treatment(s) which will be available every day. Do your treatment(s) within one hour of each other on consecutive days; there is a 2 hour window (Last treatment time plus or minus 1 hour) in which the treatment will work. If your treatments are weekly, perform them seven days later, within one hour of the previous treatment time. If the treatment time is missed you must wait until the next day to continue your treatments. If you miss two days in a row, you should start the treatment process over again, just as if you had never begun.

The treatments work if you do them correctly, and *only* when you do them correctly. Experience for yourself the gentle Power of AFT versus the force of science.

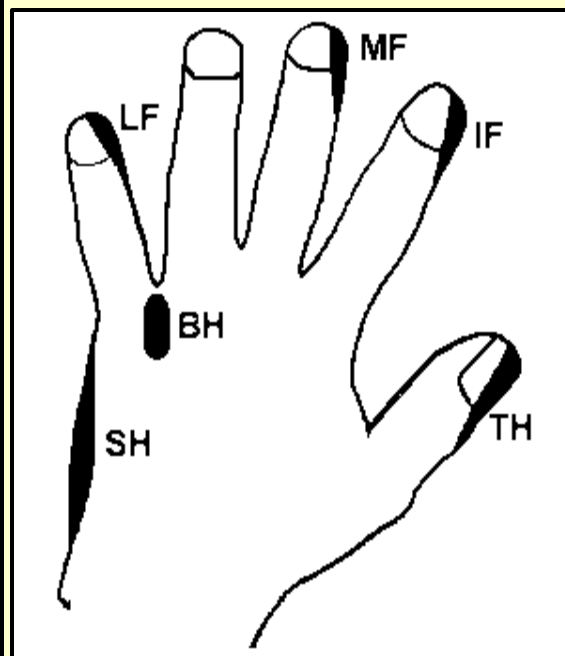

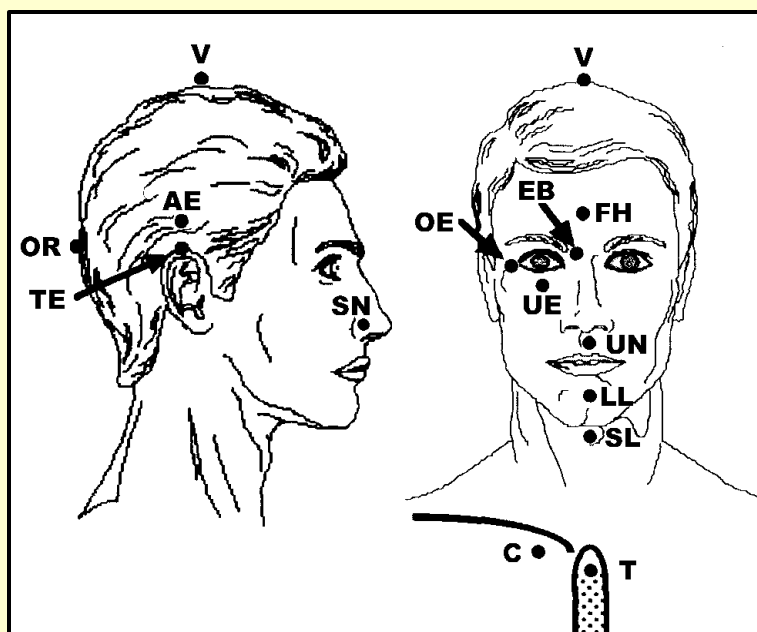

"From this time forth man may choose no longer to be enslaved by darkness;
his destiny can then be certain." ¹

AFT Addiction Elimination Formulas

Perform these Formulas to break down the belief structures and their emotional basis which result in substance craving. Begin substance control by first using the addiction belief Formula for your particular addiction, and then performing the Habit Control and Withdrawal Formulas as needed. You only need to do the addiction belief Formulas once, unless you re-addict yourself by continuing substance use.

Physical Ailment Treatment Formulas

The following Formulas rid the body of the energy fields responsible for the listed physical conditions and eliminate the symptoms that result from those energy fields. They should minimally be applied as specified. All Energy Field Clearing formula *may be repeated up to 5 times* in any one treatment or application. All Symptom Removal formulas may be repeated multiple times until symptom relief is achieved. For those interested, the formulas are now organized where possible into medically relevant categories following the MERCK MANUAL of Medical Information: Home Edition: ISBN 0-911-910-87-5.

It is important to remember that you cannot hurt yourself by increasing the number of times you apply the formulas during any treatment, and it may speed illness recovery.

If you do not obtain satisfactory results, check to make sure that you are applying the necessary formulas correctly. Try other formulas that treat related conditions; you may not have the disorder you think. Have someone else apply the Formula(s) if you have a physical limitation or problem with correctly tapping. Finally, apply the optional Level of Consciousness formulas at the same numeric level, i.e.: 75, 100, 125, etc., as your illness LoC index before you apply the physical illness treatment.

If you are working with a physical illness other than a pain disorder, remember that it will take time for the body to change after the treatments are completed, i.e., fungal infected nails will have to grow out, they will not be transformed by the treatments; the biochemical derangement's which accompany the organic mental disorders take months to resolve after treatment is completed, etc. While the cause for illness is NOT in the physical domain, the illness itself IS in the physical domain: it takes time for a disorder to change the body, and time for the body to change back after the illness is gone. *Do not* stop medications without your physician's advice.

If your symptoms still persist, continue using the Formulas as indicated above and Pray to God, as you know him, for intercession. Before starting to tap, the person being treated should say "In the Name of God, lift this affliction". If someone is assisting by reading or tapping another, the assistant should speak along with the person they are helping, saying "In the name of God" at the same time.

If nothing is listed for your particular disorder, treatment may be obtained by appointment at the Foundation's Headquarters. Please call 610-664-8053 for information.

Remember: All meridian points require 20 taps except these: BH75, UN5, and LL5

Levels Of Consciousness Formulas

The LoC formulas Listed on the following pages are designed for the following tasks:

- A.) Eliminating the Attractor Fields which open us to various physical ailments;
- B.) The elimination of the source of emotional distress via the removal of specific attractor fields during psychological treatment; and,
- C.) Increasing personal Level of Consciousness.

A.) Details: When used to assist with the elimination of physical distress, all of the specific formulas at the same numeric value as noted with the physical illness should be performed immediately before applying the illness formulas. To ensure that you do not re-attract the same illness, or another at the same level, the specific LoC formulas at that level should be applied for approximately one year after your physical illness is gone. Make sure that all four formulas for a particular level, i.e., God-View, Life-View, Emotion, and Process are applied.

B.) Details: When used during psychological therapy, the formula(s) needed to surmount a particular problem should be obtained via kinesiological testing. The statement "The energy field underlying this patient's distress is at the 175..150..125..100.. etc. level." should be utilized for this purpose. Once the level of consciousness of the problem is determined, apply all of the formulas, God-View, Life-View, Emotion, and Process. While there is no need for the patient to focus on their problem while being treated, it is not harmful if they do so. If desired, the specific formula needed to reduce distress may be obtained by questions such as "This problem is in the patient's God-View, Life-View, etc. Apply the appropriate formula(s) on the patient 1-3 times. After application, check the SUDS level of the patient's distress. If there is not a satisfactory result, there is another energy field involved. The Miscellaneous Psychological formulas are useful for specific emotional reactions and tendencies. They are used in a manner similar to the LoC's, determining which formulas may be of benefit to the patient via kinesiologic testing.

C.) Details: When used for personal growth, each of the four sets of LoC formulas should be applied daily in their totality, performing all formulas from Shame through Neutrality. Each set for formulas is to be applied in turn for 90 days (3 months). Perform them in the order that they are listed: Emotional, Process, Life-View, and then God-view. Once you have completed a particular set, you will only need to reapply the formulas in that set once a week to keep yourself clear of the associated Attractor Fields. If you are particularly energetic, and committed, you can perform more than one set on a daily basis. Thus, all four sets can be completed in as little as three months. The personal Level of Consciousness achieved across time is positive, participatory, and beneficial to society. It is what Dr. David R. Hawkins calls the "gateway" to higher consciousness.

Levels of Consciousness: Emotional

Power vs Force Level	Treatment Formulas	Emotion Transcended
Neutrality (250)	DT, AE, TE, LF, OE, UE, EB, C LL5, TH, SL, EB, SH, C	Trust
Courage (200)	LL5, BH75, C, SL, UN5, C	Affirmation
Pride (175)	DT, TE, AE, T, DT, OE, UE, EB, T, C	Scorn

Shame (20)	DT, IF, DT, C LL5, TH, C, LF, OE, SL, C	Humiliation

NOTE: All psychological formulas may be used on an "as needed" basis when, or if, the emotion(s) involved return. This *may* occur during the first 3-6 months. The formulas, when used for this purpose, should be performed *three times successively for each application*. Wait *no longer* than 5 minutes between each successive treatment.
